

CODAN INVESTMENTS

CHINA

Codan Ling Yun in China has announced a large investment as part of the strategy to be one of the leading high quality OEM hose producers in China. Two brand new rubber hose production lines, manufactured in Europe, is set to start production in May 2015. This will increase current hose capacity with approx. 10 mio. mtr/year.

The new facilities are combined with a lean manufacturing setup to the existing production areas and also include new building projects. Codan Ling Yun, which is already accredited to TS16949 and ISO14001, produces many hose types used on new vehicles and safety critical industrial equipment. Production using modern machinery, professional management, qualified engineers and staff ensures the high quality the Codan product is known for. These investments will enable Codan to reach its future goals.
